CAPITAL NATURE

Investing in a sustainable future

Anat Tsour Segal, CEO: 2020 was a challenging year that set the value of green technologies that makes the world a better place. Leonard Cohen said: "There is a crack in everything, that's how the light gets in". So even in the great challenge that befell the world this year, fascinating opportunities were found, new records were broken, companies became public and investment seed grew and watered down.

Great progress of our portfolio companies

AUGWIND

(TASE: AUGN) the stock has rose in 990% as the company reached great achievements in 2020; Signing strategic contracts with SolGreen and EDF placing the company as the technology provider of energy storage.

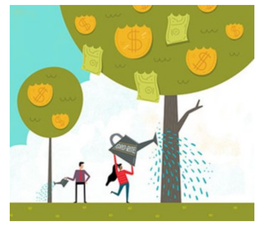
Significant agreements for Capital Nature and exciting collaborations

In June, a strategic collaboration was signed between CN and Aream GmbH – Aream will be CN's Biz-Dev representative in Continental Europe, joining British CBG who collaborates and promotes CN and its portfolio in UK, European and other markets.
In September, CN announced the establishment of a new VC Fund in collaboration with Avnon Group for investing in cyber areas for infrastructure and smart cities.

In December, CN signed an exciting strategic cooperation agreement in the UAE and the Persian Gulf with Vault Management Consultants. The Objective of the collaboration is to expose and provide access to Israeli technologies in areas of clean energy and climate tech in the UAE and in related markets.

2020 in sign of renewal



3 new companies joined our Incubator:
RoadSense – develops special sensor system that collects all the information a smart city needs without compromising the privacy of the resident.
Silib – develops 100% silicon-based anodes that can contain up to 10 times more lithium per gram compered to graphite.
ViaCool – a joint venture for CN and Ardom ICT. The company will develop a technological solution for cold storage optimization.

Facing 2021

Capital Nature aims to continue to invest in new, more mature companies with groundbreaking technologies in the worlds of renewable energy, energy efficiency and its derivatives, directly and through other platforms. We believe that CN's investment strategy will lead to interesting investments and encourage Start-Ups to develop products that are capable of changing the daily life of all of us.
